AMENDMENTS TO THE CLAIMS

   This listing of claims will replace all prior versions and listings of claims in the application:

LISTING OF CLAIMS:

   1-15. (canceled).

   16.   (new): A method for transmitting video data, comprising:

   extracting at least one first information from at least one video data, the at least one first information corresponding to the at least one video data, and transmitting the at least one first information to an external device;

   extracting and transmitting at least one second information to the external device, if a request signal for the at least one second information is received from the external device, the at least one second information corresponding to at least one selected first information among the at least one first information; and

   transmitting video data to the external device, if a request signal for the video data is received from the external device, the video data corresponding to at least one selected second information among the at least one second information.

   17.   (new): The method of claim 16, wherein the at least one first information is a list of titles for the at least one video data.

18.   (new)   The method of claim 16, wherein the at least one first information is searched by a key word related to the list of titles for the at least one video data.

19.   (new): The method of claim 16, wherein the at least one first information comprises the at least one video data grouped under categories.

20.   (new): The method of claim 16, wherein the second information is one of a video segment and a summary plot.

21.   (new)   A method for providing video data, comprising:

if at least one first information corresponding to at least one video data is received from a server, requesting at least one second information corresponding to at least selected one first information among the at least one first information;

if the at least one second information is received from the server, requesting video data corresponding to at least one selected second information among the at least one second information; and

receiving the video data corresponding to the at least one selected second information from the server and displaying the video data.

22.   (new): The method of claim 21, wherein the at least one first information is a list of titles for the at least one video data.

23.   (new)   The method of claim 21, wherein the at least one first information is searched by a key word related to the list of titles for the at least one video data.

24   (new):   The method of claim 21, wherein the at least one first information comprises the at least one video data grouped under categories.

25.   (new):   The method of claim 21, wherein the second information is one of a video segment and a summary plot.

26.   (new)   A server, comprising:

an editor which extracts at least one first information from at least one video data, the at least one first information corresponding to the at least one video data, and at least one second information corresponding to at least one selected first information among the at least one first information;

a converter which coverts the at least one first information and the at least one second information to a format displayable through an external device; and

a transmitter which transmits the at least one converted first information, the at least one converted second information, and video data corresponding to one selected second information among the at least one second information.

27.   (new):   A device, which requests at least one second information corresponding to at least one selected first information among the at least one first information, if the at least one

first information corresponding to at least one video data is received from a server, requests

video data corresponding to one selected second information among the at least one second

information if the at least one second information is received from the server, and receives and

displays the video data from the server.
